Re: **Satralloy, Site Visit**  
**OHD 010 467 538**

Dear Mr. DiPaolo:

PRC Environmental Management, Inc. (PRC), has been retained by U.S. Environmental Protection Agency (EPA) Region 5, under contract No. 68-W8-0084, to evaluate candidate sites for the National Priorities List under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and the Superfund Amendments and Reauthorization Act (SARA). PRC is conducting these site assessments under the supervision of Ms. Jeanne Griffin, Work Assignment Manager --EPA Region 5.

Information supplied to EPA through CERCLA notifications, as required by Section 103(c) of CERCLA, has identified the Satralloy property as a possible candidate site for the National Priorities List. As part of the evaluation, EPA has requested that PRC perform an on-site assessment, tentatively scheduled for January 16, 1991. As mentioned in our telephone conversation of December 26, 1991, a follow-up visit may be scheduled in the near future to conduct sampling activities. Photographs will be taken during both visits to document site conditions and activities.

A list of questions regarding information on site conditions, history, and surrounding environmental and human populations is attached. PRC has completed a preliminary records search for available information; however, your assistance is requested to answer these additional questions to assure that all information used for the site assessment is complete and accurate.

William Kosco and Trisha Miller of PRC will participate in the site visit. A copy of their EPA Region 5 contractor identification cards is attached. A representative from the Ohio Environmental Protection Agency has also been invited to participate in these visits.

If you require additional information or if a change in plans is necessary, please do not hesitate to call me at (513) 241-0149.

Sincerely,

Trisha Miller  
PRC Environmental Management, Inc. - Cincinnati
